

IR Triage Report

Front Matter

ANALYST NAME: Chibuike Ojukwu

DATE: 2025-08-28

SOURCE: security@0x2asec.com

ALERT ID: UR-INT-20250603-0047

SEVERITY: HIGH ▾

DISPOSITION: True Positive (TP) ▾

Initial Findings

- Host **we8105desk** (IP **192.168.250.100**) “executed VBScript (**wscript.exe** → **24249.vbs**) that spawned **cmd.exe** and staged **121214.tmp**:
 - Parent process: **wscript.exe** running
C:\Users\bob.smith.WAYNECORPINC\AppData\Roaming\24249.vbs
 - Child process: **cmd.exe /C ... \121214.tmp**
(Sysmon Operational, EventCode=1 process fields parsed via SPL.)
- The host contacted **solidaritedeproximity.org** and performed HTTP GETs for **/mhtr.jpg** (dest **37.187.37.150**) and **/HeaderSlice.jpg** (dest **67.132.183.25**).
(stream:http results with src_ip=192.168.250.100.)
- File-system activity under **C:\Users\bob.smith.WAYNECORPINC\...** recorded **401 distinct .txt TargetFilename** events (Sysmon EventID=2) during **2016-08-24 00:00–2016-08-25 00:00 UTC**.
- Registry artifacts on **we8105desk** show a removable device labeled **MIRANDA_PRI** with **last_seen 2016-08-24 16:42:17 UTC**.
(WinRegistry USBSTOR friendlyname/devicedesc fields.)
- SMB telemetry from **192.168.250.100** shows the highest volume to **192.168.250.20**; no second host impact was established from the evidence provided.
(stream:smb, stats count by dest_ip.)

Disposition: True Positive : host executed scriptable content and contacted a domain identified in this project as malicious.

Severity: High : impact confirmed on a single endpoint (script execution and large volume of file events). No evidence in the data provided of spread beyond we8105desk.

Incident Summary

Confirmed time bounds (UTC)

- **2016-08-24 16:42:17** – USB artifact **MIRANDA_PRI** last seen (WinRegistry).
- **2016-08-24 16:43:21** – Process lineage observed: **wscript.exe** → **24249.vbs** → **cmd.exe** referencing **121214.tmp** (Sysmon EID 1).
- **2016-08-24 16:48:12** – First recorded contact to **solidaritedeproximate.org** (DNS/stream query “first” result).
- **2016-08-24 16:48:13** – HTTP GET **/mhtr.jpg** to **37.187.37.150**.
- **2016-08-24 16:56:55** – HTTP GET **/HeaderSlice.jpg** to **67.132.183.25**.
- **2016-08-24 00:00–2016-08-25 00:00** – **401** distinct **.txt** TargetFilename events under the user profile (Sysmon EID 2).

Scope

- **One endpoint:** we8105desk (192.168.250.100).
- **User context:** **bob.smith.WAYNECORPINC** profile paths in file activity.
- **Network:** outbound HTTP to **37.187.37.150** and **67.132.183.25**; SMB primarily to **192.168.250.20**.
- **No evidence** of lateral movement or encryption on additional hosts at time of triage.

Impact.

- **Data availability degraded** on we8105desk due to encryption of at least **401 text files**.
- No confirmed exfiltration. Business impact limited to the single endpoint at this time.

MITRE ATT&CK TTPs observed.

- **T1204.002 – User Execution: Malicious File (VBScript via wscript.exe)**
- **T1059.005 – Command and Scripting Interpreter: VBScript**

- T1059.003 – Command and Scripting Interpreter: Windows Command Shell
- T1105 – Ingress Tool Transfer (HTTP GET of payloads disguised as images)
- T1071.001 – Application Layer Protocol: Web (HTTP)
- T1486 – Data Encrypted for Impact

Threat intelligence indicators (IOCs).

- Domains/Hosts: solidaritedeproximite.org
- IPs: 37.187.37.150, 67.132.183.25
- Artifacts/Filenames: [24249.vbs](#), [121214.tmp](#), [mhtr.jpg](#), [HeaderSlice.jpg](#)
- USB label: [MIRANDA_PRI](#) (potential initial vector)

Observed indicators (from evidence)

- Domain: solidaritedeproximite.org
- IPs: 37.187.37.150, 67.132.183.25
- Filenames/Artifacts: [24249.vbs](#), [121214.tmp](#), [mhtr.jpg](#), [HeaderSlice.jpg](#)
- USB label: [MIRANDA_PRI](#)

Recommended Actions

Containment / IR

1. **Isolate** host **we8105desk** from the network.
2. **Preserve evidence**: collect disk and memory images; retain [24249.vbs](#), [121214.tmp](#), relevant Prefetch, and Sysmon/Windows event logs.
3. **Reset credentials** for the affected user account and invalidate active sessions/tokens.
4. **Reimage and restore** from known-good backups after analysis.

Infrastructure prevention

1. **Block IOCs** (domain and IPs listed above) at egress controls.
2. **Constrain script interpreters** on user endpoints (policy to restrict or approve use of `wscript.exe/cscript.exe`; AppLocker/WDAC or equivalent).
3. **Harden USB policy**: restrict removable media; disable autorun; enforce device control.

Detection improvements

1. Add a rule for `wscript.exe (or cscript.exe)` → `cmd.exe` parent/child chains with user-profile paths in the command line.
2. Correlate **image downloads** (`*.jpg`) + **VBS execution** + **temp staging** within short windows.
3. Add a rule for **first-time contact to newly seen domains** followed by script execution on the same host.
4. Expand SMB anomaly detection for **post-encryption lateral writes** (early warning if scope expands).
